1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 18-21, drawn to head assembly increasing the gram load, classified in class 360, subclass 244.9.
  - II. Claim 29, drawn to head assembly with an arm beam, classified in class 360, subclass 244.2.
  - III. Claims 30-38, 69-72 and 91-92, drawn to a load beam having an adjuster, classified in class 360, subclass 294.7.
  - IV. Claims 7-12, 54, 61-65 and 90, drawn to an adjuster changed by environmental temperature, classified in class 360, subclass 97.02.
  - V. Claim 55 and 68, drawn to a head arm assembly having a modulus of elasticity, classified in class 360, subclass 244.8.
  - VI. Claim 56, 66, and 73 drawn to a head arm assembly made of different material, classified in class 360, subclass 244.3.
  - VII. Claims 60 and 86-89, drawn to drive circuitry of a disk drive, classified in class 360, subclass 244.1.
  - VIII. Claims 74-85 and 93-97, drawn to a method of maintaining a slider, classified in class 360, subclass 97.03.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I-VI and VII are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I-VII have separate utilities such as increasing gram load, utilizing an arm beam, adjusting, being changed by environmental temperature,

utilizing a modulus of elasticity, being made of different material and utilizing drive circuitry.

See MPEP § 806.05(d).

3. Inventions I-VII and VIII are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the process for using the product as claimed can be practices with another materially different product such as allowing for fluctuating flying height (i.e. CSS, disk topography, etc.).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
